

~iPadinars~

Schedule

Orientation

We will give you a short tour of the tools and practice using the webinar tools available in GoToWebinar. This will assist you in future iPadinar sessions. We will test your webinar connection.

iPad 101

Basics for iPad beginnings. Installing apps, organizing apps, and navigating. We will review some of the in-depth settings and orientation.

iPads in K12 Education

A revolution that has taken the K12 world by storm, iDevices and the implications for teaching and learning. We will review some successful implementations from around the country. Review of some basic vocabulary terms that will be used later in the iPadinar series. Open Source Books, iBooks, Stanza and more.

iPads Have Built-in Universal Access – What that Means

You will explore and learn the many aspects of accessibility the iPad has already built-in. Assistive technology overview and the most popular apps for special needs and why.

Projecting and Viewing Media

Learn the many ways to show your iOS device thru a digital projector. Make use of streaming media for small group or entire class lessons and activities. AppleTV review and orientation. How to utilize FLASH and more.

Data Collection of All Kinds on Your iOS Device

From principal “walk throughs” to student “look fors”, we will share ways to share what you find, what you learn and discover.

For Students With Special Needs!

We will attempt to encapsulate what teachers are reporting as the very best and effective Apps in the field for minimal investment.

iPads in Support of Mathematical Teaching and Learning

Everything we can gather and report in this short iPadinar on Math Apps and their success with teachers and students alike.

iPads in Support of Science Teaching and Learning

An overview of what K12 educators are using and embracing for Science Apps.

iPads for Primary Students (K-2)

What is going to get you the most meaningful interaction of students' time during this very young age. Don't waste their time – make it count.

iPads and the Arts (K-12)

Included in the iPadinar will be a review of the photography apps and art and music apps that can change engagement of students and allow them to embrace and integrate the arts into the classroom.
